What is QTableWidgetItem

Table widgets provide standard table display facilities for applications. The items in a QTableWidgetItem are provided by QTableWidgetItem.

These are some methods for QTableWidgetItem

- `setRowCount()`: this method is used to define the number of rows you want
- `setColumnCount()`: this method is used to define the number of columns
- `rowCount()`: This method returns the number of rows in the table
- `columnCount()`: This method returns the number of column in the table
